2. Answer the following: HTML has a way to scale an image down by entering a smaller width in the width attribute of the img tag. Why is scaling it down in Photoshop a better idea?
 - a. Making them smaller will allow the image to be clearer and better quality
3. Answer the following: What main message were you trying to communicate with your original image? Explain how the different parts you put together helped communicate that message.
 - a. For the second image I layered on, I used my logo on my resume that I made in my graphic design class. For the background image, I wanted to pick a neutral image but one that still represented something I love to do; which is going to the beach! For my personal photo, I used a recent photo of myself. I wanted this to represent my fun, and bubbly personality while still creating a professional vibe.
